

Tabelle Hülsenlängen

Hülsen werden durch mehrmaliges Kalibrieren und Verschießen mit der Zeit länger. Irgendeinmal kommt der Punkt wo die Hülsen zu lang, oder durch unterschiedliche Ausdehnung unterschiedlich lang sind. Dann ist es an der Zeit sie zu kürzen, zu trimmen also. Die folgende Tabelle soll aufzeigen ab welcher Länge die Hülsen getrimmt werden müssen (Max. Länge), und auf welches Maß sie getrimmt werden müssen (Trimmlänge). Sämtliche Masse sind in Millimeter (mm) angegeben und gelten nach dem Kalibrieren.
